DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1,2 and 4 are rejected under 35 U.S.C. 102(b) as being unpatentable over DuBois (US 4100455).

Regarding claim 1 and 2, DuBois discloses a fluorescent display device comprising a vacuum envelope constituted by a face plate, an anode side substrate and side plates, and cathodes arranged between face plate and anode side substrate. See fig. 4. In addition, DuBois discloses a metal sheet with multiple perforations disposed on the whole rear surface of the face plate. See claim 1(b) and column 5 lines 35-40.

Regarding claim 4, DuBois discloses that the opening and non-opening portions are arranged in a lattice like manner, see fig. 3.

Allowable Subject Matter

2. Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record neither shows nor suggests the metal film used

as a 'psuedo half mirror' made out of aluminum, nor does it show or suggests a void portion in the metal film for deposition of a getter.
